# Dissertations and Theses From Start to Finish

John D. Cone and Sharon L. Foster

**Dissertations and Theses From Start to Finish** is a practical guide to negotiating the thesis and dissertation process from beginning to end. Clearly written in a conversational tone, the authors successfully mentor students by advising them, answering their questions, and breaking down what may seem like an overwhelming and insurmountable task into a series of concrete and manageable steps.

Here's just a sampling of what **Dissertations and Theses** contains:

- helpful ways of assessing your preparation and managing your anxiety
- useful suggestions about finding out the local norms of the thesis and dissertation process, and managing your time to get the project completed
- practical advice on how to find a topic, develop a research question, and formulate testable hypotheses
- pragmatic guidelines for conducting a literature review, designing research, collecting and analyzing data, and discussing results
- effective strategies for writing the proposal and final document, and handling the proposal meeting and oral defense
- valuable tips on selecting a chairperson, committee members, and on dissertation/thesis etiquette, in general
- constructive ideas for transforming your project into a conference paper, poster presentation, and journal article... and much, much more!

*"...[Dissertations and Theses] raises questions that you'd never think (or dare) to ask and comes to useful answers. You will learn a lot and, if – the best of all possible outcomes – you become an academic, it will help you in your work with your own students."*

**Dr. Gregory A. Kimble, Professor of Psychology, Duke University**

*"[Dissertations and Theses] is long overdue in psychology. The authors demonstrate a clear grasp of both faculty and student perspectives in the thesis process....Particularly well done are the sections on choice of a topic, time management, and committee/chair selection – areas where students likely need the most help."*

## ANNOUNCING...

# The 20th Anniversary Edition of the American Psychological Association's *THESAURUS of Psychological Index Terms*

The *Thesaurus* is an indispensable aid to searching the PsycINFO<sup>®</sup>, PsycLIT<sup>®</sup>, and ClinPSYC<sup>™</sup> databases. It contains the controlled vocabulary used for indexing these databases and *Psychological Abstracts*<sup>®</sup>.

The 7th Edition is presented in hardcover and is thumb-indexed for easy access.

There are many enhancements throughout the publication:

- ▶ 219 new postable descriptors and over 100 new scope notes have been added.
- ▶ Hierarchies in the Relationship Section have been reconstructed to show only descriptors that are directly broader or narrower to the main term.
- ▶ The Rotated Alphabetical Terms Section has been redesigned to save steps. For each nonpostable term listed, the appropriate descriptor appears with it.
- ▶ Neuropsychology & Neurology and seven subclusters have been added to the Clusters Section.
- ▶ The front matter has been expanded with more information about searching PsycINFO's databases, including a Master Quick Reference Guide.

## ORDER YOUR COPY TODAY!

Note: A free copy of the 7th Edition of the *Thesaurus* will automatically be sent to organizations subscribing to PsycLIT.

# Jeopardy *in the* Courtroom

## A Scientific Analysis of Children's Testimony

Stephen J. Ceci and Maggie Bruck

The credibility of children's testimony is a highly debated topic in America's courtrooms, universities, and living rooms. Does the ingenuousness of children assure that their testimony will always be truthful? Or are children easily misled by overzealous investigators and therapists into making untrue allegations? Stephen J. Ceci and Maggie Bruck contend that the truth falls somewhere between these extremes. Using case studies, ranging from the Salem Witch Hunt to the Little Rascals Day Care Case, to illustrate their argument, *Jeopardy in the Courtroom* draws from the vast corpus of scientific research to clarify what is most relevant for evaluating and understanding children's statements made in the legal arena. Bringing good science and good sense to a topic that is as timely as it is controversial, Ceci and Bruck

- ♦ provide prevalence and incidence statistics on child abuse,
- ♦ provide theoretical overviews of memory and suggestibility,
- ♦ trace the history of research on suggestibility from the turn of the century to the present,
- ♦ explore the dynamics of structured and therapeutic interviews with children,
- ♦ examine the topic of recovery of repressed memories of early childhood abuse,
- ♦ evaluate the research regarding age differences in the reliability of children's reports, and

- ♦ offer tips for conducting interviews with children in a sensitive and professional manner.

Written in lively, accessible language by acknowledged experts in the field, this book will be an invaluable guide for expert witnesses and all those who work with child witnesses, including therapists, social workers, law enforcement personnel, and lawyers.
